

# CHILDREN'S MIRACLE NETWORK CAUSE PARTNERS AND PROGRAMS

Every year, Children's Hospital of Wisconsin makes nearly 2 million connections with kids and families in Wisconsin and beyond. To provide the best care for kids, Children's relies on investment from the community to help support many of our programs and services that aren't reimbursed by Medicaid and private insurance. Since 1983, Children's Miracle Network (CMN) has helped fill those funding gaps for Children's. Your partnership helps support our vision that Wisconsin's kids will be the healthiest in the nation.

In 2018, CMN cause partners and programs collectively raised more than

## \$2,500,000

to support Wisconsin's kids and families.

Campaigns through Children's Miracle Network are the most powerful way to engage the community and generate support that makes a difference for kids. We are grateful that you invested your time, talent and leadership to make 2018 such a great success. Thank you for **helping us help kids!**

### How Children's Hospital of Wisconsin makes a difference for kids

Every day, our mission at Children's is to ensure that every kid receives the very best care. When our patient families tell their stories, they share a common message: how grateful they are that Children's never, ever stopped at "good enough." You see this difference when we bring comfort and distraction to families facing long hospital stays, when we promote well-being by reaching kids in at-risk communities and when our researchers make discoveries that mean tomorrow's children will not suffer from today's diseases.
